Initial situation

A parent explains that their physically disabled child has difficulty holding toys properly. This makes it difficult to find activities for the child. Tiptoi® books are interesting for the child, but they find it difficult to hold the pen.

The care treasure

The family wrapped sandpaper around a tiptoi® pen. This gives the pen more grip.

Benefit

The child can now hold the tiptoi® pen a little better and engage with the books on their own. This takes some of the pressure off parents.
